

Adornee (= root):

Adorner (= child):

- *AnchorH* is expressed as a **fraction** of the component width; 0.0 is left, 1.0 is right, 0.5 is horizontal center.
- *AnchorV* is expressed as a **fraction** of the component height; 0.0 is top, 1.0 is bottom, 0.5 is vertical center.
- *AnchorH* and *AnchorV* may go beyond the range [0,1] to get anchors **outside** of the components.
- By default the adorner is positioned relative to the adornee so the root and child anchors will coincide. You may additionally specify an *OffsetH* and *OffsetV* to control the positioning of the anchors with respect to each other, in pixels.
